BAGEL · Frozen GEN + Spatial UND Velocity Correction

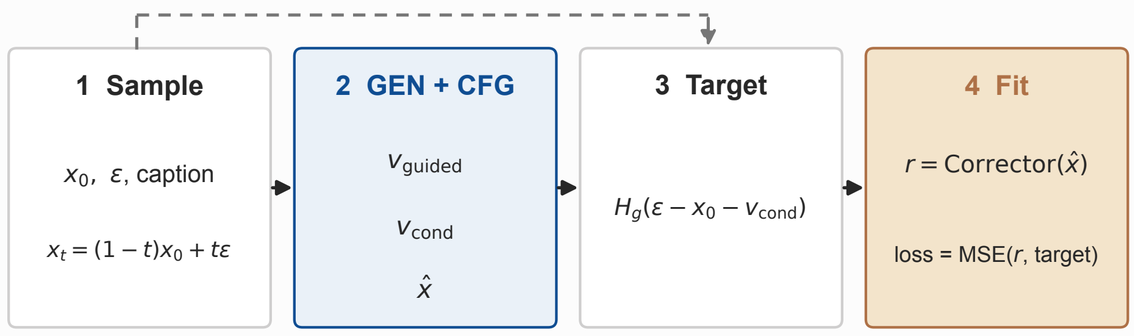

Method

❄ Frozen Trainable KV context

A BAGEL MoT · T2I

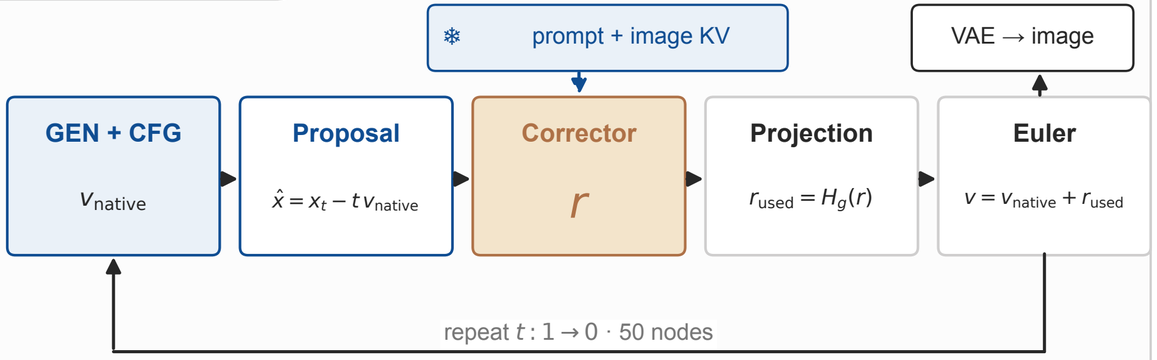

B Training

$g = v_{guided} - v_{cond}$ · $H_g(z) = z - \min(\langle z, g\rangle / \|g\|^2, 0)\, g$

❄ frozen: GEN · UND trainable: corrector

C Inference

r: velocity correction predicted by the corrector
